

*Let's make it easy to open doors for everybody!*

- Did you know that, today, people over 65 in the United States total more than the entire population of Canada?
- Did you know that one in four people in the US is over 50?
- Did you know that persons with physical challenges constitute 18% of Palm Beach County, that's almost 1 in every 5?
- Barriers to Mobility affects all ages and genders. A person who is afflicted with only a temporary disability can face a physical challenge if access to a facility is difficult!
- People with physical challenges tend to feel like second class citizens when buildings are not accessible!

People over the age of 65 have the most money to spend! You might want to make it easier for them to get into your stores!

- People with physical challenges represent a large portion of the overall population and represent a significant number of potential clients and consumers. Those barriers to accessibility for this segment of the population results in untold revenue for the retailer!
- Automatic door openers make it so much easier for the physically challenged to gain entrance to facilities!
- Residential or commercial/ institutional complexes can be made more user friendly for persons with physical challenges with only slight modifications, even a door bell would help!
